"MANUAL ON INDUSTRIAL STATISTICS, Vol. I"

By D. V. Savinskiy

Translated from Russian into Korean by Ch'oe Hak-son 25 Feb. 1950

Published by the State Planning Board, P'yongyang

323 pp.

Editor's Note:

The present book is a translation of the economic textbook entitled, "Course in Industrial Statistics", 3d Edition, published in 1949 by the Gosplan Publishing House, U.S.S.R.

Although the original book contains 12 chapters in one volume, editorial expediency necessitated us to break it up into 3 volumes; Volume I contains the first three original chapters. Volumes 2 and 3 are scheduled to follow.

Table of Contents

Preface (7)

Chapter I. Objectives and Functions of Statistics for Socialized Industries. (10)

1. General concepts of Industrial statistics (10)
2. Industries which can be used as subjects of statistical studies (16)
3. Industrial statistics of Russia before the Revolution (23)
4. Industrial surveys for the First Five-year period following the October Revolution (31)
5. Industrial statistics before World War II (35)
6. Industrial statistics during World War II (44)
7. Present industrial statistics system of the Soviet Union (47)

8. Industrial statistics of capitalistic nations (52)

9. Specific functions of Soviet industrial statistics (59)

Chapter II. Collection and Handling of Statistical Data (70)

1. Peculiarities entailed in the statistical observation of socialized industries (70)

2. Unit of population for observation and measurement (76)

3. Factories as basic units of measurement (80)

4. Importance of clearly defining factories as basic units of measurement (83)

5. Classification of vertically and horizontally integrated industries (91)

6. Comparing of reports in the process of organizing data (98)

7. Classification of Data by industries (107)

8. Basic problems entailed in classification by industries (116)

9. Classifications by product uses, by industries, and by economic groups A and B (119)

10. Classification by sizes of plants (122)

11. Other basis of classification (125)

12. Classification by administration districts and geographical distribution (130)

13. Industrial survey (145

14. Statistical averages (136)

Chapter III. Statistical Analysis of Industrial Products (145)

1. Functions of statistical measurement and analysis of industrial products (145)

2. Basic components of industrial products (149)
3. Classification of products by various stages of production (155)
4. Criterion for differentiating finished products from unfinished products (165)
5. Calculation of output and cataloguing of products (171)
6. Over-all production index and methods of spot survey (180)
7. Price index of output (184)
8. Output valuation based on constant price and on the price during the period surveyed (189)
9. Constant price for 1926-1927 period (192)
10. Various types of output price indices; the so-called total velocity of circulation (198)
11. General principles governing calculation of total output (208)
12. Output calculation of unfinished goods (224)
13. Conversion of cost price of unfinished goods into delivered price (238)
14. Peculiarities entailed in the calculation of total output for different industries (240)
15. Different methods of calculating total output (243)
16. Commodity output (254)
17. Output index for finished products (258)
18. Techniques for measuring total output and commodity output (260)
19. Production quota index for the goods assigned by the state for production (265)
